

Handybin Waste Services & Big Bins

Environmental Policy

Overview

Our company objective is to align ourselves with achieving a reduction of waste that ends up in landfill by implementing a program of resource reduction and recovery. Our focus is on the redirection of waste away from landfill to alternative uses along with the effective use of resources in the day to day running of our business activities.

Our Environmental Objectives are

- Focus on the effective and sustainable use of resources in the day to day operation of our business.
- Implement programs and handling of waste to minimize waste that ends up in landfill.
- Align our company with other businesses and companies that accept various waste types that implement waste reduction and resource recovery programs.
- Focus on delivering recoverable resources to processing facilities that apply resource recovery and value added production methods to produce new products & energy.
- Adhering to state and local government policy and guidelines.
- Develop and implement programmes that address the environmental impact of our activities in the operation of our business activities.

Our Commitment

- To fulfill our objectives to the best of our ability.
- Provide guidance and training to key personal in order to meet our objectives.
- To continually review how effectively we meet our objectives.
